Accuplacer Testing Information

ACCUPLACER is a placement test offered by the College Board. It is similar to COMPASS in that it is not timed; it is adaptive; it will test a student's skills in reading, writing and math; and its answers are multiple-choice. A student is allowed one retest per section and must wait 14 days from the original test date. **The retest fee is \$25 per section.**

The tests are:

- **Reading Comprehension** – 20 questions
The test measures your ability to understand what you read, to identify main ideas and to make inferences.
- **Sentence Skills** – 20 questions
The test measures your understanding of sentence structure - what makes a sentence complete and clear.
- **Arithmetic** – 17 questions
The test measures your ability to perform basic arithmetic operations and to solve problems that involve fundamental arithmetic concepts.
- **Elementary Algebra** – 12 questions
The test measures your ability to perform basic algebraic operations and to solve problems involving elementary algebraic concepts.

Questions are presented based on individual skill level. A student's response to each question drives the difficulty level of the next question. The score range is 20 – 120. Final scores are based on the number of questions answered correctly and the difficulty level of the questions answered correctly.

For all Math Sections – If the math question warrants the use of a calculator, an on-line calculator will open at the top of the page. **NO** hand-held calculators are allowed.

Summary:

- ACCUPLACER tests are all multiple-choice
- There is no time limit on the tests
- It can be taken all at once or in parts
- Hand-held calculators are not allowed
